

Evaluating Geospatial Information

Activity 1: Locating the Metadata

Learning objective: Determine whether or not metadata exists for a given resource

For this activity, locate the metadata for one of these data sets:

- [Existing Land Use: Dublin, Ohio](#)
- [Functional Class Roads - Existing](#)

If you are unable to find the answer, please explain that in your response.

1. What information can you discover from the Geoportal record?
2. Is there a metadata link in the Geoportal record? Does there appear to be meaningful metadata?
3. Use the Visit Source button to get more information – is there metadata available from the original data source?
